Currency	£ GBP
Annual management charge	0.50%*
Ongoing charges figure ('OCF')	0.50%
Annual yield (current)	2.56%

*Not including platform fees
Source: FE Analytics as at 30.06.23

Investment update - June

Equity markets performed strongly over June. The Japanese market continued to lead the way with sentiment buoyed by the improving economic backdrop. The US market also performed well and it is encouraging to see market leadership broaden away from 'big tech'. Corporate earnings growth is slowing across the developed world but not by as much as first feared. The relatively modest earnings downgrades and the degree of resilience the corporate sector is showing is incompatible with a 'normal' recessionary environment. US inflation has dropped to 4% and it is expected that the US Federal Reserve can now pause its tightening cycle. In contrast, above expectation inflation numbers in the UK led to the Bank of England raising interest rates to 5% with peak rate expectations up to 6%. Central banks will be closely observing economic indicators to assess the effect of higher rates and tighter lending conditions, which may add some uncertainty to the future direction of policy. No changes were made over the month – equity market exposures were maintained as the strategy remains towards the upper end of its corresponding Dynamic Planner risk profile. We are exploring a potential opportunity to reallocate some equity exposure towards continental Europe and Japan, whilst slightly reducing exposure to the US. We believe that valuations in both regions look attractive, whilst in Japan the long-term disinflationary cycle may be nearing an end.

Discretionary Managed Portfolio Service

The service consists of six actively managed investment models, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment models are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The model is managed in accordance with Dynamic Planner risk profile 5 (Low Medium), with the model's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Discrete performance

	YTD	2022	2021	2020	2019	2018
RHIM Blended	2.5%	-6.0%	10.2%	4.1%	11.4%	-5.2%

RHIM performance is net of fund charges, but does not include RHIM discretionary management fees, nor fees that may be incurred through your financial adviser. Highlighted ARC PCI figure is provisional. Past performance is not a guide to future results. See full risk warning overleaf.

About Richmond House

We launched our discretionary management service in 2006, and have navigated the portfolios through good times and bad. We're proud to say that we've protected our clients' capital and today we have around £200 million of funds under management.

We focus on both actively managed funds and lower cost passive funds where appropriate, taking a sensible approach and always maintaining our awareness of downside risks. Adopting a global view, we continually identify where the risks and opportunities lie.

We offer a range of model portfolios, and the discretionary powers of our specialist team allow us to make alterations to these quickly and efficiently. Each portfolio typically holds between 25 and 30 funds selected from the whole of the market, ensuring diversification across asset classes, countries and sectors.

We conduct our own fund research using specialist tools such as Morningstar, but we also take the opportunity to meet fund managers regularly face-to-face to ensure each fund continues to meet its objectives and remains appropriate to our clients' needs.

Headline asset allocation and positioning

Summary of current Investment Committee positioning

	UW (-)	N (=)	OW (+)	Key
Fixed interest		■		■ Current UW (-) Underweight N (=) Neutral OW (+) Overweight
Equities			■	
Property	■			
Alternative investments		■		
Cash	■			

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
